

LT-3800-5A

LED Multi-function Controller

USER INSTRUCTION

(Pls kindly read through instructions before use)

Forword

Thanks for choosing our LT-3800-5A Controller. Before installation and use, we strongly recommend you to read through this manual carefully. If device has been damaged during transport, please report it to your supplier immediately. Please don't take any action without contacting your supplier

After-sales Service

From the day you purchase our products within a year, if being used properly in accordance with the instruction, and quality problems occur, we provide free repair or replacement services except the following cases:

1. Any defects caused by wrong operations..
2. Any damages caused by unauthorized removal, maintenance, modifying circuit, incorrect connections and replacing chips.
3. Any damages due to transportation, vibration etc after the purchase.
4. Any damages caused by earthquake, fire, lightning strike, pollution and abnormal voltage.
5. Any damages caused by negligence, inappropriate storing at high temperature and humidity environment or near harmful chemicals.
6. Product has been updated

Safety Warnings

1. Please don't install this controller in lightening, intense magnetic and high-voltage fields.
2. To reduce the risk of component damage and fire caused by short circuit, make sure correct connection
3. Always be sure to mount this unit in an area that will allow proper ventilation to ensure a fitting temperature.
4. Check if the voltage and power adapter suit the controller & if anode or cathode definition is the same as the controller's.
5. Don't connect cables with power on, make sure a correct connection and no short circuit checked with instrument before power on.
6. Please don't attempt any repairs yourself; doing so will void your manufacture's warranty.

For update information, kindly please consult with your supplier.

Product Brief

LT-3800-5A RGB controller is a unique DIY version as well as a powerful combination that can control color changes of LED lights with 4-pin 3-loop cables (common anode), built-in 18 modes with touch functional buttons, provided with IR wireless remote control panel, users can control color changes of LED light by pressing the button on the controller or on the remote control panel, very users friendly.

I . Technical Specs

Model: LT-3800-5A

Input/Output Voltage:	DC5V-DC24V
Output Current:	5A/CH * 3CH
Output Power:	75W(5V) 180W(12V) 360W(24V)
Changing Mode:	18 modes
Grey Scale:	256 levels per RGB
Static Brightness:	16 levels per RGB
Product Size:	L142×W73×H30mm
Package Size:	L145×W88×H46mm
Gross Weight::	0.35kg

II . Features

1. Automatic switch from DC5-DC24V;
2. With 24 Buttons IR Wireless remote control, reliable control distance can reach as far as 10m;
3. Several DIY Storage Buttons, to record your favorite effect ;
4. 0-100% dimming and 16 levels of static brightness per RGB, can mix 4096 colors.
5. 3-Channel RGB full color control, maximum outputs 5A per Channel.
6. 256 Grey scales per RGB, color-smooth effect is gentle and accurate.

7. Can choose changing speed separately and adjust the brightness of each mode.
8. Can rest at current color and color depth by selecting PAUSE function.
9. Working with our LT-3060, can expand power unlimitedly.

V, Operating instructions

1, Instructions of controller and remote's keys:

Instruction of controller's buttons

Instruction of IR remote's buttons

2, detailed key functions

Sign	Button	Description
	ON /OFF	Turn on/off the controller  Any button can start the controller at off status.
	PAUSE	Press this button will rest at current color, it will continue to change if press again. Press this button in 3 seconds, the buzzer can be on or off.
	MODE+ MODE-	Press them to select next mode or back to previous mode, press MODE+ or press MODE- over 3s to enter cycle mode.
	SPEED+ SPEED-	Press them to quicken or slower speed, press SPEED+ or SPEED- over 3s, current speed is restored to Default status.
	BRT+ BRT-	Press them to increase or decrease brightness, press any one over 3s, current brightness is restored to Default status.
	DIY modes	Press them over 3s, LED flickers twice, then remember current change mode on this button, it can save 4 modes, just press it once then enter into pre-setup mode.
	DIY modes of remote	Press them over 3s, LED flickers twice, then remember the current mode on this button, it can save 8 modes, later can reach your pre-setup mode by just pressing it once.
	PLAY	Cycle play the 4 pre-setup modes in controller.

	PLAY+	Cycle play the 8 pre-setup modes in IR remote controller.
	RGB Dimming	0-100% dimming per RGB, 16 levels of brightness per RGB, you can get kinds of color effects. $R16 \times B16 \times G16 = 4096$, you can mix 4096 static colors.

VI. Tables of changing modes

Sequence	Modes	Description	Remark
1	Static red	Normally on red	Brightness adjustable
2	Static green	Normally on green	Brightness adjustable
3	Static blue	Normally on blue	Brightness adjustable
4	Static yellow	Normally on yellow	Brightness adjustable
5	Static purple	Normally on purple	Brightness adjustable
6	Static cyan	Normally on cyan	Brightness adjustable
7	Static white	Normally on white	Brightness adjustable
8	3-color skipping	Red, green and blue 3-color skipping	Brightness and speed adjustable
9	7-color skipping	Red, green, blue, yellow, purple, cyan, white 7-color shipping	Brightness and speed adjustable

10	White color strobe	White (with all red, green and blue on) strobe	Brightness and speed adjustable
11	3-color smooth	RGB 3-color gradual changes	Brightness and speed adjustable
12	Full color smooth	All 7-color gradual changes	Brightness and speed adjustable
13	RG color smooth	Red, green 2-color gradual changes	Brightness and speed adjustable
14	RB color smooth	Red, blue 2-color gradual changes	Brightness and speed adjustable
15	GB color smooth	Green, blue 2-color gradual changes	Brightness and speed adjustable
16	White color fade & change	white (with red, green & blue on) gradual bright & fade	Brightness and speed adjustable
17	Great cycle	All changing modes overlap cycle	/
18	RGB static dimming	0-100% dimming per RGB	16 levels of brightness per RGB

VIII. Exception Handles

Malfunction	Causation	Settle
No light	1. No power from plug 2. Power supply protection works 3. Incorrect connection or cable loose	1. Check the socket 2. Check the malfunction, re-power on 3. Check connection
Incorrect color	4. Incorrect RGB output wire connection	4. Re-connect RGB wires correspondently
No changes for certain mode	5. Speed is too slow	5. Press Speed to accelerate

Uneven brightness of LED between front and rear	6. Output cable is too long 7. Wire diameter is too small 8. Overload beyond power capability 9. Overload beyond controller capability	6、 Reduce cable or use daisy-chain power 7、 Change wider wire 8、 Change power supply 9、 Add power amplifier
--	--	---

Kind remind:

The effective power of the power supply in market is 80% of what it is written, so customers should choose a higher power supply than the actual LED load, at least 20% higher.
