

# KATANA™ AVENCIA™ Block 2

## Multi-Layered & High-Translucent Hybrid Ceramic Blocks

**KATANA™ AVENCIA™ Block 2 is a hybrid ceramic block for chairside CAD/CAM restorations, available in Multi-Layer (ML); highly suitable for (endo) crowns and High Translucent (HT); your partner for partial restorations.**

Designed for daily dentistry, it supports efficient workflows and predictable results across indications. The material enables smooth margins directly after milling, easy finishing and polishing, and reliable handling with low technique sensitivity. KATANA™ AVENCIA™ Block 2 supports clinicians to achieve consistent functional and aesthetic outcomes with fewer procedural steps, supporting greater control and efficiency in everyday practice. It offers a streamlined alternative to more complex and time consuming ceramic workflows, particularly in routine cases where efficiency and consistency are key.

### Features and Benefits

**STRONG**

With excellent mechanical properties KATANA™ AVENCIA™ Block 2 offers the strength you need for dependable single-unit restorations.

**SWIFT**

Time-effective, speedy workflow. Save valuable time and reduce operational costs without compromising on quality.

**EXPRESSIVE**

ML for natural gradation | HT for blending. Both offering seamless optical integration and high-gloss finish.

**ANTAGONIST-FRIENDLY**

Designed for minimal wear.

CHOOSE  
WET OR DRY  
MILLING

### Time-effective workflow

KATANA™ AVENCIA™ Block 2 offers speed by eliminating several steps needed with other indirect workflows. Its low technique sensitivity directly positively effects fit, margins, and overall consistency. Short processing time including milling and quick high-gloss polishing allows immediate placement.

Cement your restorations with PANAVIA™ SA Cement Universal or PANAVIA™ V5 for stable adhesion and minimised risk of error.

# TWO EFFICIENT, AESTHETIC OPTIONS

## Multi-Layer (ML)

Block with a multi-layered colour structure with a natural appeal

Expressive by design:  
seamless multi-layer gradation

- Pre-engineered shade/translucency gradient for natural looking results
- Delivering enamel - dentin transition straight from the block
- No need for complex characterisation steps
- Fluorescence through and through
- Maintain healthy gums thanks to smooth surfaces

## High-Translucent (HT)

High translucency variant designed for partial restorations

Invisible by design:  
High Translucent for natural optical integration

- Higher translucency supports blending-in
- Helps maintain natural value in common clinical situations
- Aesthetic results with just polishing
- Build-in fluorescence

## Shades and Sizes

### Multi-Layered shades (ML)

- A1 ML, A2 ML, A3 ML, A3.5 ML

### High-Translucent shades (HT)

- A1 HT, A2 HT, A3 HT, A3.5 HT

### Available sizes:

- Size 12: 10(A) × 12(B) × 15(C) mm (HT only)
- Size 14L: 14.5(A) × 14.5(B) × 18(C) mm
