

BETTER PERFORMANCE - BETTER SOUND

PLAY FASTER AND EASIER

More mass means you don't have to grip too firm. This results in less hand fatigue and better grip because your fingers won't sweat. It's easier to focus on speed.

PERSONAL AND LONGER LASTING

These guitar picks just wear a little bit, right in the way you play and they last up to one year or more. The hardness of the material ensures you don't create chipping edges.

MULTIFUNCTIONAL

The beveled edges all around, allow you to use every side of the pick. The Tritone Series® picks even have 3 useable tips.

SOUND

Not that plinky thin sound, but more volume and a more pronounced tone as well; Even when playing near to the bridge you will create more mid- and low-end tones and these picks are extremely receptive to pick harmonics.

ORIGINAL SERIES

REGULAR 2.6mm \$ 8,95

LIGHT 2.2mm \$ 8,95

shredder 3.5mm \$ 8,95

TRITONE III SERIES

BADAZZ III 2.0mm \$ 7,95

BADAZZ III 2.5mm \$ 7,95
