The **IDEAL SCOPE MOUNT SYSTEM** series of mounts feature **seven set of interfaces** to attach any of more than 40 different accessories. The rings are diagonally cut for increased visibility of the elevation and windage turrets (US Patent 8,733,011).

The mounts are machined from billet 7075 T651 aluminum and all aluminum parts are hardcoat anodized. The Torx 20 ring and clamping screws are zinc-nickel coated for corrosion resistance. The screws come pre-waxed from the factory to ensure proper torque values.

The mount is shipped with a manual and a "wedge" leveling key.

### NOTE:

The SP-6026 was designed for 3-gun competition by **The Noveske Shooting Team**. This mount was designed for use on AR-15 carbines and does not align with back-up iron sights. Due to the low height and extreme cantilever, the SP-6026 does not feature a bubble level as the rest of the ISMS series do.
