

SURGICEL™ Powder
Absorbable Haemostat

Presenting SURGICEL™ Powder

Built to stop continuous,
broad-surface oozing*—fast**, #, 1-4

*Continuous oozing defined as bleeding that will not stop with compression / simple packing

**TTH study of surgicel powder show average time to haemostasis of 30 seconds

is ready to use out of the package with no preparation required

 **ETHICON**

The next generation of SURGICEL™ Absorbable Haemostats

SURGICEL™ Powder Absorbable Haemostat
provides effective control of continuous
oozing on broad surfaces^{2,5 *}

- Ready to use out of the package, with no preparation required³
- Penetrates through the blood quickly to stop bleeding right at the source, effectively achieving haemostasis in a wet field^{6,7}
- After haemostasis has been achieved, the bleeding site will not rebleed even if SURGICEL™ Powder is irrigated^{7 **}

Flexible Tip:

The flexible tip on both the open and endoscopic applicators allows for aspiration in any direction in open and minimally invasive procedures (MIPs)^{2,4,8,9}

Get to the source of the bleed

The structure of the powder allows it to penetrate the surface of the blood to get to the source of bleeding^{6,16}

- 1** **SURGICEL™ Powder**
Absorbable Haemostat
provides effective
control of continuous
oozing on broad
surfaces^{2,5*}

SURGICEL™ Powder
is an aggregate of small oxidized
regenerated cellulose (ORC)
fiber fragments^{2,3}

- 2** Blood saturates the material,
providing a surface for platelet
adhesion and aggregation,
working with the patients
endogenous clotting factors to
initiate clot formation¹⁰

- 3** Built to stop
continuous,
broad surface
oozing*—fast^{†**, #, 1-4}

- 4** Forms a durable clot that
won't wash away or
rebleed when irrigated^{7†}

[†]based on pre clinical animal study

Rigid Tip:
The rigid component of the
endoscopic applicator is designed
for one-handed application and
enables easy access in MIPs^{4,8}

Efficient Aspiration:
Provides precise control of delivery
during application, minimising product
waste¹¹

Indication:

SURGICEL Powder (oxidized regenerated cellulose) contains an aggregate of ORC fibre fragments intended to help control capillary, venous and small arterial haemorrhages or other conventional methods of control are impractical or ineffective.^{2,3}

*Continuous oozing defined as bleeding that will not stop with compression / simple packing

**TTH study of surgical powder show average time to haemostasis of 30 seconds

[†]is ready to use out of the package with no preparation required

Everything you've come to expect from the SURGICEL™ Family of Absorbable Haemostats

- Proven bactericidal in vitro against a broad range of gram-positive and gram-negative organisms, including various antibiotic-resistant bacteria (*MRSA*, *VRE*, *PRSP* and *MRSE*)^{3,15}
- Contains an aggregate of ORC fiber fragments that help control capillary, venous, and small arterial haemorrhages^{2,3*}

Easy application across both open and laparoscopic procedures^{2,4,9,17}

- The 2-in-1 endoscopic applicator is sold separately and is composed of 2 components, the rigid tip and the flexible tip
- The rigid tip allows for one handed use and easy powder delivery in MIPs^{4,8}
- The flexible tip allows for aspiration in any direction in open and minimally invasive procedures^{2,4,8,9}

Built on a legacy of performance

SURGICEL™ Powder Absorbable Haemostat is an addition to the SURGICEL™ Family of Absorbable Haemostats

For illustration purposes only and may not represent an actual device specification.

Ordering Information

Code	Description	Device Specifications	Quantity (per box)
3023SP	SURGICEL Powder	3.0 grams	5 units
3133SPEA	SURGICEL Endoscopic Applicator	2-in-1 applicator	5 units
3043TP	TABOTAMP Powder	3.0 grams	5 units
3143TPEA	TABOTAMP Endoscopic Applicator	2-in-1 applicator	5 units

SURGICEL™

Family of Absorbable Haemostats

One family. **Five products.** 50+ years.

Original

Fibrillar™

Powder

Snow™

Nu-Knit®

The SURGICEL™ Family provides a breadth of solutions for all continuous oozing bleeding situations.
Continuous oozing: Bleeding that will not stop with compression/simple packing.
The solution for this bleeding is more time consuming than it is difficult.
