OGLE

Design by Form Us With Love

Flexible spotlight with its own expression

In 2009, design studio Form Us With Love created the luminaire called Ogle. There was a gap in the market for pendant spotlights that could be easily adjusted to direct the light. "We wanted a lamp that looks good by itself but also among a group of lamps", says Form Us With Love.

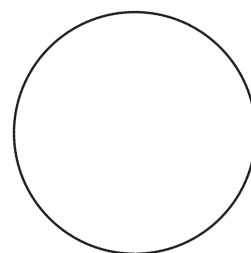

The luminaire has a lampshade in size of a melon and at the bottom of the globe a LED eye keeps watch. An eye that can shift its gaze thanks to a groove on top of the lamp.
