		Rev.	Date of issue
		Sheet 1/5	

Please mark the
bottom row screws
as they attach the lid
to the rest of the box

Assemble the Bottom (first 2 screws each through the foot, then 3 each through the plate in each foot). 2. Drill the 4 holes into "Small Side". 3. Position and screw Inside pieces onto Bottom and position engine stand. Screw through the plate into the lumber. 4. Tighten the 4 bolts fixating the engine stand to the box. 5. Build the lid separately (it's basically a table with 4 walls that are longer than the legs. Screw legs to lid plate, then walls to legs). 6. Put the lid on and fix it to the Inside pieces with 3 screws on each side. Make sure to use the two long screws ones on the right spot (the middle of the longer sides, through the reinforcements which you can pre-drill if you want). 7. Mark these last screws with a sharpie, so we can find them.Thank you!
