

## Description

- completely made of stainless steel
- 30 liters capacity
- tub size Ø 700/500 x 170 mm
- single-piece basin
- menu for dual programmable thermostat in 3 languages
- run-time and consumption control
- energy-efficient insulation
- special heating element design for up to 30% oil savings
- easy fastening system for churros machines

## Technical data

|                                                                                     |                         |                    |
|-------------------------------------------------------------------------------------|-------------------------|--------------------|
|  | Electric power:         | 13 kW              |
|  | Voltage:                | 400V               |
|  | Supply frequency:       | 50Hz               |
|  | Width x depth x height: | 830 x 830 x 870 mm |
|  | Net-weight:             | 90 kg              |
|  | Content / Capacity:     | 30 Liter           |
