

Description

- for the slow and gentle preparation of food
- very precisely adjustable preparation processes
- temperature range 30 to 120°C
- temperature setting in 1°C steps
- with warming function
- separately adjustable core temperature probe
- ideal heat distribution by heating from all 4 sides
- additional insulation for best energy efficiency
- digital control panel with timer and display of cooking chamber temperature and core temperature
- rounded corners in the seamless cooking chamber for easy cleaning
- door hinged on the right (reversible)
- side handles
- suitable for trays with 1/1 GN or 600x400 mm
- incl. stainless steel tray

Technical data

	Electric power:	1,2 kW
	Voltage:	230V
	Supply frequency:	50Hz
	Width x depth x height:	495 x 690 x 415 mm
	Net-weight:	24 kg
