

Features:

- Compact rechargeable 365nm UV flashlight
- For fluorescent use in mineralogy, hygiene and various other fluorescent activation
- Powerful 3W 365nm UVA LED
- Built-in 18650 lithium-ion battery
- Battery life: >4h
- Charging method: micro USB interface
- 2-mode High-Low
- Equipped with a ZWB2 UV bandpass filter
- Water Resistant IPX4

Brand	Colorgems
Material	Aluminum
Lens	ZWB2 UV bandpass filter
Led type	365nm UVA
Dimensions	107mm x 22mm
Modes	High-Low
Color	Black
Weight	56g
EAN/GTIN	950553127947

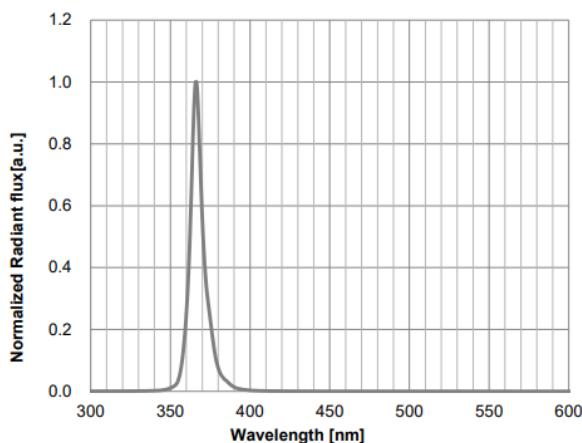

Technische Specifications:

Colorgems A365-pocket lamp power: ~ 3W

Optical output: ~2000mW

Output type: spot

Led spectrum:

A365-pocket 365nm UV Flashlight

Charging the internal battery:

Connect the supplied USB charging cable to a USB adapter / interface of 5V/1000mA minimum.

The switch button lights up red during charging. When the battery is charged, the switch button lights up green.

Warning:

1. Use the supplied USB cable to charge
2. NEVER look directly into the light beam. UVA light is invisible. Prolonged exposure can be harmful to skin and eyes
3. The lamp may become warm when used for a long time. Be careful when touched.
4. Keep smaller parts of the package away from children to avoid choking.
5. The best effect of UV light is obtained in the dark.
6. Do not disassemble or modify the flashlight. Careless handling or modification of the flashlight will void any warranty on the flashlight.

Warranty:

All Colorgems UV flashlights have a two-year manufacturer's warranty on a carry-in basis. The warranty starts on the day of purchase. The warranty is void if the flashlight has been modified or defective due to fall, damage, incorrect use or battery leakage.
