

1L DRIP TORCH

VALLFIREST
GLOBAL SOLUTIONS FOR WILDFIRE

1 L Fuel Drip torch manufactured by Vallfirest is a forest fire fighting tool designed to carry out fast maneuvers when fighting technical fires, like backfire or escape fires like backfires or escape fires. This forest fire fighting hand tool is ideal for crews transported by helicopter as they can carry the torch in the lateral pockets of their fire packs, as well as for fire controlling and analyzing vehicles. This forest fire fighting tool is necessary for carrying out indirect attack maneuvers: backfires, escape fires, self-protection fires and fires to create equipment safety zones.

Weight: 460 gr with the handle | 340 gr without the handle
Can be carried on pack belts

It has a deposit approved for fuel transportation and also includes different safety systems, such as a non-return valve inside the stopper and a flow control valve. The asymmetrical double-coiled stopper is the element that makes the tool compact. This is definitely a great forest fire fighting tool as far as its operating capacity, transportation and potential performance, which are all different from systems such as lighters or Bengal fires.

TORCH CARRYING BAG CHARACTERISTICS:
