

vft Universal Pump Flotation System

The Vallfirest **UPFS** is the ideal solution for quickly and easily transforming your portable pumps into efficient floating pumps. This lightweight, compact, and portable system eliminates the need to invest in additional floating pumps for aquatic operations.

It is perfect for first-response situations, operations in flooded areas, or water sources with hard-to-reach suction points. Thanks to its inflatable design, it adapts your portable pumps into an efficient and versatile floating solution for any type of intervention.

Features

- **Lightweight and portable design.** It takes up little space, is easy to transport, and can be set up in just a few minutes—perfect for rapid deployments.
- **Complete kit:** Includes a manual inflation pump, a suction hose with a strainer foot valve, cords, carabiners, and a repair kit.
- **Floating base for external fuel tanks** included.
- **Multi-chamber anti-sinking system.** Prevents equipment from sinking in the event of a float puncture.
- **Sealed design** that prevents fuel and oil spills from contaminating the water.

Details & Components

- Floats made from **double-layer 5mm red PVC** (RAL 3020).
- Black PVC **anti-spill bottom**
- **Thermal protectors** made of aluminum fiber for the engine exhaust system areas.

- **Anti-sinking system** composed of 3 chambers for the pump float and 4 chambers for the fuel tank float.

- **Marine inflation valves** for the different chambers of the anti-sinking system.
- High-strength **nylon ropes with carabiners** for securing and connecting the floats.

- High-capacity **manual inflation pump**, lightweight, with an included pressure gauge.
- **60-foot nylon rope** with carabiners for towing the system.
- **Suction hoses** designed to work as close to the water's surface as possible.
