

FIREFIGHTER JACKET (SIMPLE LAYER)

Fire-resistant firefighting jacket EN 15614 with a simple layer for great protection from direct attacks and friction and for better breathability.

THERMAL AND RADIATION INSULATION

Fabric based on CONEX, TWARON and VISCOSE FR fibers for perfect thermal and radiation insulation for the user. Raised neck at the back for nape protection. High-visibility reflective bands in front, arms and the back.

RESISTANCE

NOMEX seams and special resistance to friction and wear inherent to a forest setting. Adjustable wrists with fire-resistant Velcro. Four front pockets that easily open for gloves, one of them adapted for portable radios. Velcro for identification on the chest.
