

DRYING CABINET

Registered design

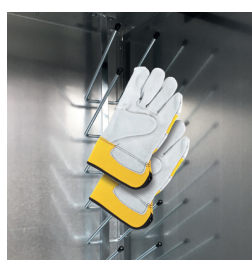

The guarantee of fully dried shoes and clothes

We have designed a closet with a heating and ventilation system to dry clothes, shoes and gloves and thus ensure matchless comfort to all people working sometimes in difficult conditions. This product is indispensable for outdoor workers such as construction sites, road works, railroads, airports, mines, refrigerated environments, ski resorts and many other areas.

Model with doors

Gloves shelf

DESCRIPTION

- Possibility to adapt the cabinet from 7 to 12 people
- Forced-air heating dryer
- 2 high-speed ventilations systems optimising the drying (700m³/hour, 1600W power)
- Fixed and resistant shoe-holders made with aluminium to ensure their durability
- Solid galvanized steel structure (15/10)
- Robust and insulating PVC thongs
