Fig. FIRE INFORCER, QA07, dark blue 203

WE ARE ONLY SATISFIED WITH THE VERY BEST

The TEXPORT® Triple Fabric® is a textile reflective stripe that is made from fabric and therefore is extremely breathable and more durable. The reflective, silver-stripe material composition, patented by 3M*, adheres very well to the structure of the soft fabric. In addition, the TEXPORT® Triple Fabric® is abraded less severely through wear and washing.

EU Patent 08102991.0
*3M EU Patent 1974621

KNEE PAD

The TEXPORT® knee pad is a cushioned, flame-resistant knee pad, that adapts to the anatomy of the wearer and avoids creating pressure marks.

OPTIONAL WEATHER PROTECTION WITH BUTTON-IN MEMBRANE

The TEXPORT® FIRE INFORCER can be upgraded to a weatherproof garment with the optional membrane. The membrane is buttoned into the jacket using connecting buttons and merges into a single unit.

OPTIONALLY AVAILABLE

MODERN PROTECTION IN TECHNICAL TERRAIN

The TEXPORT® FIRE INFORCER is a modern garment for the technical emergency services. It combines a modern cut of jacket and trousers with a progressive, highly visible look and the quality of a premium product. The FIRE INFORCER has a flame-resistant outer fabric and therefore complies with EN ISO 11612. The jacket offers additional flexibility thanks to a removable membrane (optionally available) and can be used in all weather conditions.

FIRE INFORCER

Item description	Outer layer	Composition code	Composition	Norms	Colour variants	
FIRE INFORCER Jacket	Aramid Viscose	Q A 07	Aramid Viscose	EN ISO 11612, EN 343 *, EN 1149-5	203 dark blue	010 gold
