FIRE X-FLASH

## THE INNOVATIVE MATERIAL COMPOSITION FOR EXTREME PROTECTION AND COMFORT.

### Material composition

----- outer layer  
----- intermediate layer  
----- membrane  
----- lining

X-TREME® is made up of four layers:  
outer layer, intermediate layer (TNX, Heat Comfort Barrier), membrane (GORE-TEX Fireblocker N and GORE-TEX moisture barrier with GORE® CROSSTECH® product technologies) and lining (Nomex®/Viscose)

### Material composition

----- outer layer  
----- intermediate layer  
----- membrane / flameliner

X-TREME® light is made up of three layers:  
outer layer, intermediate layer (Heat Comfort Barrier) and membrane / flameliner (GORE-TEX Flameliner® G and GORE-TEX moisture barrier with GORE® CROSSTECH® product technology)

## THE HERO OF THE NEXT GENERATION

With the TEXTPORT® FIRE X-FLASH, we are redefining the boundaries of the possible for EN 469 protective clothing.

All of our expertise in the areas of materials, ergonomics, functionality and processing techniques has come together in the new FIRE X-FLASH.

Never before has our motto “the greatest protection, the best design and optimal functionality” been implemented at such a high technical level!

For the first time, TEXTPORT's® new star will be shown to professionals, the press and interested visitors at INTERSCHUTZ in Hanover. Available from October 2022.

Fire X-Flash IB-TEX® Dark blue / Gold 542

Fire X-Flash IB-TEX® Gold / Dark blue 535
