

For securing electric vehicles in an accident

Fire resistant up to constantly 1.000°C and peaks of 1.300°C

Set consists of two blankets and an optional protective fleece

Top blanket features straps, bottom blanket features metal fasteners

COVERING THE VEHICLE SAFELY FOR TRANSPORT OR STORAGE

1

Spread out the bottom blanket und place on the trailer. Ensure metal fasteners are laid flat.

2

Place vehicle on the blanket and secure front and back wheels.

3

Cover the vehicle with the fleece in order to protect the paint of the car.

4

Spread out top blanket and cover the vehicle with a sweeping motion. The straps must be on top.

5

Gradually fold the bottom blanket upwards, pull the straps of the top blanket through the fasteners and tie them.

6

The vehicle is wrapped securely. If it catches on fire, the surrounding area and the transporting vehicle will be protected.

Sustainable, re-usable and environmentally friendly

Tested by the fire brigade and ADAC service partners

Large enough for SUVs or vans

Made by the experts for textile fire protection
