Features:

BBQ grill plate preparation before first use:

- Before 1st use clean the cooking surface with warm soapy water and a sponge. Thoroughly rinse with fresh water.
- Dry the cooking surface and then lightly coat the cooking surface with non-stick cooking spray or cooking oil.
- Heat the BBQ grill plate for 20 mins on the fire pit and then remove to let it cool down naturally.
- Wash the grill plate with warm water and then dry the cooking surface.
- Pre-heat the grill plate again before cooking.

Optional cast iron hotplates:

The ARB fire pit comes standard with a mild steel BBQ grill plate. However, locating tabs have been added to the side plates to accommodate cast iron hotplates commonly found at your local BBQ retail stores. Many hotplates with the dimensions 480mm x 400mm, 480mm x 320mm & 480mm x 240mm should fit.

Optional rotisserie kits:

Mounting holes have been included on the end plates of the fire pit to suit most battery powered rotisserie kits commonly found at your local BBQ retail stores.

Note - There may be some discolorations, scratches or markings on the steel from new, this is due to the raw steel finish and manufacturing process. This is normal and is of no cause for concern. we will take every effort to make sure the steel is in as best quality as can be expected for this type of production.

Always follow and check with local guidelines and laws before operating this fire pit.
