

LAUNCHING ON: 07/04/2025
99.4% NATURAL, 75% ORGANIC

RRP: £40

Our age-defying hero - now even better!

Rediscover a youthful glow with our newly reformulated Age Defying Multi Peptide Cream designed to target multiple signs of ageing by visibly reducing the appearance of fine lines and wrinkles while also restoring the lost firmness.

This certified organic formula updates and replaces Evolve's best-selling Multi-Peptide 360 Anti-Ageing Cream with the addition of Hexapeptide-8, a powerful peptide known as a natural alternative to injectables. Hexapeptide-8 helps to relax facial muscles, smooth wrinkles and firm the skin, restoring a radiant, youthful complexion. Enhanced with Sacha Inchi Peptides, this luxuriously rich moisturising cream boosts elasticity, providing a natural firming effect.

Perfect for dry and mature skin, it also features Ceramides, Cacay Oil, Hyaluronic Acid, and Cupuacu Butter, to deeply hydrate, lock in moisture, and strengthen the skin barrier, combating dryness and loss of elasticity.

This enhanced new formula is infused with a luxurious natural fragrance blend of organic Rose Otto, Mandarin, Sweet Orange, and Vanilla.

Experience the next level of natural age-defying skincare!

AGE DEFYING MULTI PEPTIDE CREAM

KEY INGREDIENTS

ACETYL HEXAPEPTIDE 8

Acetyl Hexapeptide-8 is a powerful age-defying ingredient renowned for reducing the appearance of expression lines and wrinkles. It works by gently relaxing facial muscles to prevent new wrinkles while improving skin firmness and elasticity. Often referred to as an alternative to injectables, this peptide is clinically proven to reduce wrinkle depth by up to 30% in just 30 days.

SACHA INCHI PEPTIDES

Peptides extracted from Peruvian superfood Sacha Inchi Seeds that are known to be rich in nutrients and amino acids. Sacha Inchi Peptides are clinically proven to improve facial firmness, reduce wrinkles volume and smooth the skin by improving dermal density.

CERAMIDES

Ceramides are essential lipids that strengthen the skin barrier, improve hydration, and reduce transepidermal water loss while protecting against environmental stressors. They enhance skin texture and smoothness, making the skin more resilient and healthy. At a concentration of 0.05%, ceramides have been clinically shown to boost skin hydration by 30% within just 7 days and it is this effective concentration that is included in Age Defying Multi Peptide Cream.
