Serving Selection

Duragrip : Ultra small diameter and highly abrasion resistant, Duragrip is the ultimate end loop and roller guard serving available today. Goes on transparent for that custom look on any string material.

Bullwhip : .014 braided endloop, string, and cable serving. Bullwhip is our "go to" premiere serving material. White goes on clear for that custom look and performance.

1D / Mini : Brownells most dependable twisted end loop serving. Very versatile for any application. Mini - .015, 1D - .019

Diamondback : The industry standard when it comes to center servings with a diameter to fit any application. Available in .018, .022, .026, and .030 diameters.

Crown : Our most versatile premiere braided center and end serving, Crown goes on with a "slick" finish. Works great for traditional finger shooters or any compound or crossbow application. Available in .018, .022, and .026 Diameters.

Fusion : A great option for that single cam buss cable that is prone to separation. Fusion is also highly abrasion resistant. Available in .015 and .019.

RCT : Designed to make serving separation issues a non issue! Great application for flight tracks on crossbows and extreme center serving angles created by short axle to axle compound crossbows. Available in Black only in .022, .026, and .036 Diameters.

Crossbow : As the name implies, this tough wearing 100% HMPE braided serving is ideal for handling the punishment that crossbows demand on center servings. .036 Diameter

#4 Nylon : Our "Do all" economical serving. Great for securing peeps, nock points, and is our most popular traditional serving for all traditional applications. Works great with B-50 String material.

Cable Fix : Ultra small diameter serving material for that "Quick Fix" where serving separation has already occurred. Also works great on high wear areas such as cable slide track. Goes on clear.
