MicroMike™ E-Series

EAR CLIP-ON MINIATURE MICROPHONE

CHOICE OF CONNECTORS

NO-BREAK CABLE CONNECTION

EXCHANGABLE CABLE

SILICONE COVERED FOR GRIP
AND COMFORT

- Superb sound quality
- Voice contoured frequency response
- Excellent gain before feedback

- Compatible with leading brands
- Exchangable cable/connectors
- Comfortable

The ACE MicroMike is ideally suited for vocal sound and speech applications by bringing the microphone close to your mouth.

This will improve gain before feedback by typically 12dB compared to an omnidirectional lavalier microphone. MicroMike is the microphone of choice when you need the highest quality voice pickup without the bulk and appearance of a conventional headset.

MicroMike E-Series clip around your ear, not around your head so it never interferes with hairstyles, headphones or glasses. For a firm and comfortable grip, the microphone part in contact with your ear is covered with a thin silicone tube.

Extended Frequency Response:

The ACE MicroMike has a wide 20Hz to 20kHz frequency response and is shaped for excellent vocal intelligibility.

Connectors:

Different connectors are available for the most common wireless transmitters.

Replaceable Cable:

Inexpensive replacement cables are available. If the cable breaks you just replace the, not the entire microphone..

Protected:

MicroMike comes in a protective hard leathercase together with accessories.

TECHNICAL SPECIFICATIONS

SENNHEISER VERSION

SHURE / SABINE VERSION

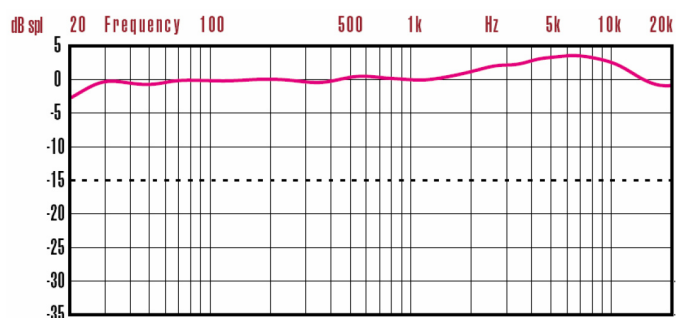

AKG / AUDIX VERSION

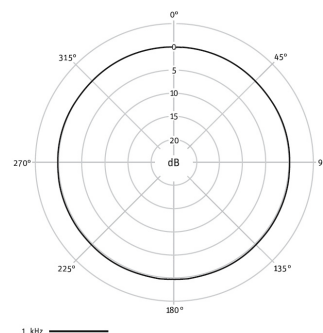

MIPRO VERSION

Sensitivity:	$\pm 3 \text{ dB } 1\text{V/Pa}$
