1K Universal FillClean **400 ml for 1K solvent-basecoats** **Art. Nr. 233975**

Product

Description / Purpose

Spray can prefilled with propellant gas and solvent for one-time filling with the cleaning-free FillClean device provided for this purpose.

Filling process with use of a filling device:

Remove the spray head with a slight twist and fill the can with 100 ml of paint using the filling device intended.

We recommend sieving the paint before filling into the filling cap or filling cylinder.

The operating instructions of the manufacturer of the filling device must be observed.

After the filling process, assemble the spray head with a slight twisting motion again.

Assemble the cap and note the paint / colour code and filling quantity on the can where appropriate.

Substrate

Primed, filled surfaces and well-preserved factory or old paintwork (cleaned and sanded)

The damaged area must be dry, free of grease and dust-free and any rust must be removed.

Processing

Shake

Shake the FillClean can filled with lacquer thoroughly for 2 minutes before use - from when the mixing balls are heard.

Spray to test

After shaking the can, test spray and check compatibility with the surface and the colour.

Spraying distance

15 cm - 25 cm

Hold the can as upright as possible.

Properties of the filled can

The processing properties of the can filled with lacquer, its service life, the properties of the applied coating and the possible further coating structure depend on the paint system used.

Please contact your specialist dealer.

Processing conditions

In most cases, the optimum processing conditions are 18° C - 25° C and a relative humidity of 40 - 60 %

Finish

After painting, turn the can upside down and spray for 3 - 5 seconds to clean the valve.

Additional Information

Important Information

Avoid bumps, friction and impact.

Suitable for 1K solvent-based paints.

Always check the suitability of the paint system beforehand.

The processing of the can filled with lacquer depends heavily on the lacquer material used.

Do not leave the spray can without the spray head for a longer period of time, otherwise the spray head may no longer be able to be fitted.

Shelf Life

The information on usability refers to an unused can when stored properly between 15 - 25° C and a relative humidity not exceeding 60 %. The can must be stored and transported in an upright position in a dry place where it is protected against chemical and mechanical influences. The safety information on the can and all statutory provisions applicable for the storage site must be observed.

Disposal

The completely emptied spray cans must be disposed of in the recycling system.

Cans with hardened material must be disposed of as special waste.

Note

For professional use only.

For labelling see safety data sheet.
