

LED Bulkhead Pro V2

DESCRIPTION

The LED Bulkhead Pro V2 replaces CFL fixtures and generates at least 50% in energy savings. It's ideally for use on walls and ceilings in corridors, stairwells, parking garages, walkways and for security lighting. The IP65 and IK10 ratings indicate that the fixture can be used for both indoor and outdoor environments and it is vandal-proof. The Bulkhead Pro V2 can also be purchased with emergency kit and extra savings can be increased with an optional motion sensor. The new Bulkhead Pro V2 is wattage and color temperature switchable, with one model you can adjust the wattage from 12W, 16W or 20W and switch color temperature from 3000K, 4000K and 6500K.

By replacing CFL fixtures with the LED Bulkhead wall and ceiling fixtures, enormous savings in energy and maintenance costs are achieved and a short payback period is guaranteed.
