Reinstating the overspeed shut-off device

- Push the ball out of the seat from the bottom to retrieve it from the cover.

- Push the ball into the governor (in the space between the cage and the disc).
The ball should seat in the hole of the disc (X on the picture).

**The tool shall never be started without the ball locked in the disc groove.
The tool shall never be started without the proper governor (35) fastened
to the rotor (30).**
