

Field of Application

Maintenance cleaning of soldering pallets, condensate traps and soldering equipment machine parts

Customer benefits

Defluxing concentrate for PCBA; low odor; eliminates corrosive and flammable chemicals

Please consider approvals of equipment manufacturer!

Technical Data

Appearance / Consistency: Colorless to slightly yellow, clear

Application: 1 part concentrate + 4-5 parts DI-water

Density at 20°C: 0,967 +/- 0,005 g/cm³

pH-value: Alkaline

Boiling point / boiling range: >100°C

System: Waterbased (ready-mixed)

Flashpoint: None (ready-mixed)

Operations temperature: 50-65°C

Reliable cleaning results with: Flux residues

Shelf life (month): 36

Storage conditions: Ideal in original packaging at 10-25°C

Transportation: Non-DG

Packaging: 5 L blue plastic can
20 L green plastic can

Application notes:

The waterbased, alkaline cleaning concentrate in mixed 1 part concentrate : 4-5 parts DI water to remove bakend flux residues from PCBA. Usually use is within spray-in-air and ultrasonic cleaning equipment at temperatures inbetween 55-65°C.
