XS S M
L XL XXL

Weight

1575 g +/- 50 g (Polyfusion)

Homologation

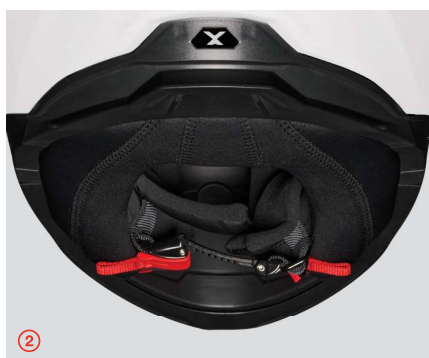

ECE/22-06, DOT FMVSS 218;
CCC and NBR-7471:2001

1 **VENTILATION AND AIRFLOW**
The large upper vent and the extremely efficient chin ventilation system allow a large volume of cool air to enter the helmet. In turn, the dual EPS Liner includes an innovative air chamber between them: this allows a truly breathable helmet, with optimum exchange of warm, humid air with incoming cool, fresh air.

2 **SAFE & COMFY**
All Y.100 are manufactured with Polyfusion shell technology, characterized by its compactness and with high impact resistance and available in two shell sizes for an outstanding fit and comfort.

3 **ACTION CAMERA SUPPORT**
Record all your travels and your best moments to remember them later. Practical and removable, one support for action cameras come included with the helmet, to facilitate its placement on the side of the helmet

4 **X-COM 3 MOTORCYCLE COMMUNICATION SYSTEM**
Subtle yet packed with powerful capabilities, the new X-COM3 series can be fully integrated into the helmet, with built in earphones, battery, cable slots, microphone, and Bluetooth 5.2 technology, available in two variants: the X-COM3 standard, a mid range version with capable features and the X-COM3 PRO that brings 2.0 Mesh Technology alongside other extra features and world class sound by Harman Kardon.
