

EDS8DSP - V3
STANDALONE DSP PROCESSOR

The all new EDS8DSP8 DSP processor delivers the most powerful and flexible processing solution in the EDGE range.

The EDS8DSP8 is a stand alone 8 channel DSP processor which allows the user to simply turn any existing amplifier into a DSP powered beast! With multiple inputs such as Optical digital and audio streaming, the EDS8DSP8 turns any factory headunit into an audio receiver allowing you to wirelessly stream your music while on the move. The smartphone app allows full control of all settings such as gain, crossover, time alignment, 31 band parametric Eq and many more functions. The inbuilt mixer allows the input signal to be summed and distributed to any desired channels, perfect for a multiple speaker setup where only a stereo input exists.

Model	EDS8DSP-E3
Type	8 channel DSP Processor
Dimensions (H x W x D)	1.6" x 5.3" x 5.2" (40 x 135 x 131mm)
Frequency Response	10Hz - 30kHz
Crossover Type	LP / HP / BP / Flat
LP Crossover Range	20Hz - 20kHz
HP Crossover Range	20Hz - 20kHz

PREMIUM DESIGN - Made from a cast aluminium chassis, with a sleek black design, visually the EDS8DSP is will seamlessly integrate with your existing audio setup .

BEST CONNECTIVITY - Featuring optical and coaxial digital input, high and low level input as well as audio streaming input, the EDS8DSP has all the critical ways of connecting to the DSP.

APP CONTROL - The EDS8DSP can be wireless controlled via our in house from the ground up designed mobile app. With features such as crossover adjustment and volume control, time alignment and more.

BEST SOUND - The DSP unit can turn any factory headunit into a powerhouse with its wireless connectivity. As being an option to bypass the factory headunit by streaming audio straight to the DSP, useful in some newer vehicles where its not an option to use an aftermarket headunit.

BASS ENHANCE

The DSP allows you to fully customize your EQ settings allowing you to boost bass in the frequencies that matter to you the most for your personal taste.

12V REMOTE OUT

12V Remote out allows you use the DSP as a source for a 12V remote to turn on other amps in your system.

DSP

Controlled via the mobile app the EDS8 has near unlimited tuning potential, allowing you to control many functions whilst on the go.

RCA OUTPUT

RCA output provides an audio output for amps in your system allowing them to be controlled via the DSP

AUTO SENSE

Intelligent Auto Sense turn on means there is no need for a remote wire to turn on the DSP making installation easier.

HIGH LEVEL INPUT

HIGH Level input for fast simple installations of the DSP.
