GB

Electric grill with 2 heating zones, grill surface 770x470 mm

Completely made of the AISI 304 stainless steel. With innovative design, the grill offers unique solutions to your needs. Each of the stainless steel tubes has one, an independent heating element inside. Since heating surface is not flat, you can actually grill meat, fish or vegetables and all undesired fat drains through its grate grooves down into the fat tray. All points of the heating surface have the same temperature. Food gets grilled with the minimum energy loss due to the fact that the heaters are just below the food.

I

Griglia elettrica da banco con 2 zone di cottura, area di cottura 770x470 mm

D

Elektro-Rostbräter mit 2 Heizzonen, Grillfläche 770x470 mm

E

Parrilla eléctrica con 2 zonas de calentamiento, superficie de la parrilla 770x470 mm

FR

Gril électrique de table avec 2 zones de chauffage, surface du gril 770x470 mm

P

Grelhador eléctrico com 2 zonas de aquecimento, superfície de grelha 770x470 mm
