

Oxypot set up instructions

Components

1 x 19L Outer pot

1 x Lid including access cap

1 x Basket

1 x Swivel elbow assembly including blue pipe

1 x Round air stone

1 x Air pump including spare air line and spare mini air-stone

1 x 1.5m Air line tube

1. Remove the nut and one washer from the swivel elbow assembly
2. Push the threaded end of the swivel elbow assembly through the hole in the pot
3. Reattach the washer and nut and secure the swivel elbow in position using a suitable spanner (IWSC2201)
4. Turn the elbow so that the blue pipe is vertical and clip the pipe into position using the + on the underside of the rim
5. Connect the air line to the air stone and place the air stone in the recess in the base of the pot. Run the air line through the groove in the top of the pot and connect to the outlet of the air pump
6. Place the lid on to the pot so that the access cap is to the left of the blue pipe
7. Place the basket in position
