

# Grillkåta TOMTESGUGA

## 9,2m<sup>2</sup>

## Foundation and Air Supply for Grill

En stabil grund – grunden för en bra upplevelse. För att din Grillkåta ska fungera som den ska över tid är det viktigt med en korrekt förberedd grund.

Vi rekommenderar att grunden anpassas efter lokala markförhållanden och byggs enligt våra skisser. Underlaget ska vara jämnt, stabilt och homogent, så att konstruktionen står säkert utan att påverkas över tid.

Innan installation rekommenderar vi även att grunden förses med fuktskydd (isolering) för att minimera påverkan från markfukt. För bästa resultat är det alltid klokt att rådgöra med en lokal byggare eller ingenjör, som kan säkerställa att lösningen passar just din tomt och dina förutsättningar.

En bristfällig eller ojämn grund kan leda till att konstruktionen påverkas negativt – till exempel sprickor i materialet, skevhet i formen eller att dörrar och fönster inte sluter tätt. I värsta fall kan det påverka hela produktens stabilitet.

En korrekt grund gör hela skillnaden – både för funktion, hållbarhet och känsla.
